

L.A.

Michael Koenig 2018

FLORA 

L.A. structure is a strict geometric shape. In an extremely playful way, Michael Koenig has combined this tension in a product which harmonises function and shape in ways no others can. It is not only the plant which climbs up the supporting grid – the product itself appears to be ascending the wall. On the little tablets trays plants in standard pots can alive the natural structure as well, for example for indoor use with herbs in a kitchen or entrance area. The trays can be hooked at each straight position.
